

2023 Western Region Summary

Prevea has played a significant role in providing care to the residents of Western Wisconsin as well as the surrounding regions. Services provided by Prevea have covered a variety of areas, including Birth to 3 programs, worksite clinics, mental health, urgent care, and primary care. The closure includes 26 sites clinical sites and the medical partnership of four Birth to 3 programs. A number of the clinics serve rural areas in the region that already have limited access to healthcare.

21% of the 2023 visits (33,489 visits) were Medicaid patients who face other access to care barriers in the region.

Additionally, the loss of mental health and substance abuse services provided by Prevea will have a significant impact on not just the city or county where those services ended, but the greater region as there is an overall lack of these services particularly in rural areas.

156,515

Visits to Prevea Clinic Sites
in the Western Region in 2023

Total Visit Counts by Clinic

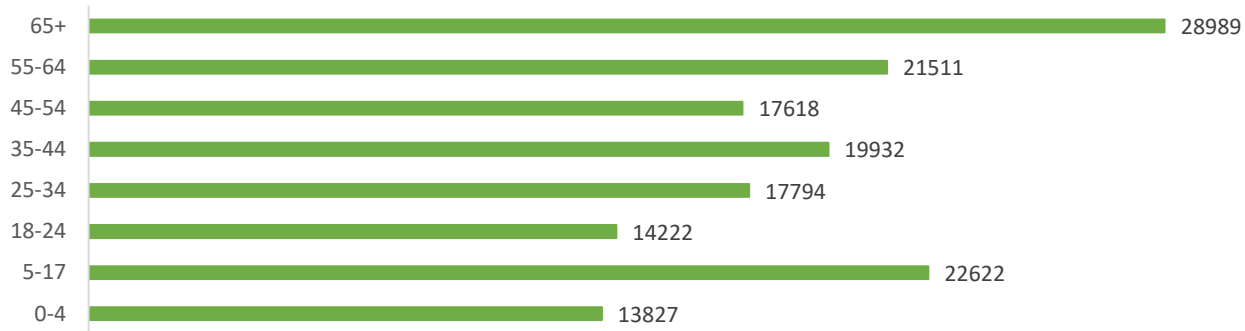

Clinic Names	Services	Location	Total Number of Visits	Number of Providers
Barron County Birth to 3	Birth to 3	Barron County	693	N/A
